

## § 680.30

(C) Lists where the test weights and equipment will be stored; and

(D) Lists the names of the personnel responsible for conducting the scale testing.

(iv) *Printed record.* An RCR must ensure that the scale produces a complete and accurate printed record of the weight of each species in a landing. All of the crab in a delivery must be weighed on a scale capable of producing a complete printed record as described in paragraph (e)(3) of this section. A printed record of each landing must be printed before the RCR submits a CR crab landing report.

(v) *Observation area.* Each CMP must designate an observation area. The observation area is a location designated on the CMP where an individual may monitor the offloading and weighing of crab. The observation area must meet the following standards:

(A) *Access to the observation area.* The observation area must be freely accessible to observer, NMFS staff or enforcement aides at any time during the effective period of the CMP.

(B) *Monitoring the offloading and weighing of crab.* From the observation area, an individual must have an unobstructed view or otherwise be able to monitor the entire offload of crab between the first location where crab are removed from the boat and a location where all sorting has taken place and each species has been weighed.

(C) *Other requirements.* The observation area must be sheltered from the weather and not exposed to unreasonable safety hazards.

(vi) *Plant liaison.* The CMP must designate a plant liaison. The plant liaison is responsible for:

(A) Orienting new observers, NMFS staff and enforcement aides to the plant;

(B) Assisting in the resolution of observer concerns; and

(C) Informing NMFS if changes must be made to the CMP.

(vii) *Drawing to scale of delivery location.* The CMP must be accompanied by a drawing to scale of the delivery location or vessel showing:

(A) Where and how crab are removed from the delivering vessel;

(B) The observation area;

## 50 CFR Ch. VI (10–1–10 Edition)

(C) The location of each scale used to weigh crab; and

(D) Each location where crab is sorted.

(viii) *Single geographic location.* All offload and weighing locations detailed in a CMP must be located on the same vessel or in the same geographic location. If a CMP describes facilities for the offloading of vessels at more than one location, it must be possible to see all locations simultaneously.

[70 FR 10241, Mar. 2, 2005, as amended at 70 FR 75421, Dec. 20, 2005; 73 FR 76190, Dec. 15, 2008; 75 FR 56486, Sept. 16, 2010]

## § 680.30 [Reserved]

### Subpart C—Quota Management Measures

#### § 680.40 Crab Quota Share (QS), Processor QS (PQS), Individual Fishing Quota (IFQ), and Individual Processor Quota (IPQ) Issuance.

(a) *Crab QS and Crab QS fisheries.* The Regional Administrator will issue crab QS for the crab QS fisheries defined in paragraph (a)(1) of this section. The Regional Administrator will annually issue IFQ based on the amount of QS a person holds. Crab harvested and retained in each crab QS fishery may be harvested and retained only by persons holding the appropriate crab IFQ for that crab QS fishery.

(1) *Allocations.* With the exception of the WAI golden king crab fishery, the Regional Administrator shall annually apportion 10 percent of the TAC specified by the State of Alaska for each of the fisheries described in Table 1 to this part to the Western Alaska CDQ program. Ten percent of the TAC in the Western Aleutian Islands golden king crab fishery will be allocated to the Adak community entity. The remaining TACs for the crab QS fisheries will be apportioned for use by QS holders in each fishery.

(2) *Official crab rationalization record.* The official crab rationalization record will be used to determine the amount of QS that is to be allocated for each crab QS fishery. The official crab rationalization record is presumed to be correct. An applicant for QS has the
